SOFTWARE ENGINEERING – MODULE 2

Introduction to Programming

SESSION / ASSIGNMENT – 13

TASKS :

1. Create a file called playlist.txt and write the names of your top 3 favorite songs from Spotify into it using write mode (w).

```
#include <stdio.h>

int main()
{
    FILE *fp;

    fp = fopen("playlist.txt", "w");

    fprintf(fp, "Believer\n");
    fprintf(fp, "Perfect\n");
    fprintf(fp, "Shape of You\n");

    fclose(fp);

    printf("Songs written successfully.\n");

    return 0;
}
```

OUTPUT:

```
Songs written successfully.
```

Playlist.txt

```
playlist.txt
1 Believer
2 Perfect
3 Shape of You
4
```

2. Open playlist.txt in read mode (r) and display each song name on a separate line in the console.

```
int main()
{
    FILE *fp;
    char song[100];

    fp = fopen("playlist.txt", "r");

    while(fgets(song, sizeof(song), fp) != NULL)
    {
        printf("%s", song);
    }

    fclose(fp);

    return 0;
}
```

OUTPUT:

```
Believer
Perfect
Shape of You
```

3. Add two more song names to playlist.txt without deleting the existing ones by opening the file in append mode (a).

```
#include <stdio.h>

int main()
{
    FILE *fp;
    char song[100];

    fp = fopen("playlist.txt", "a");

    fprintf(fp, "\n21 Guns\n");
    fprintf(fp, "My Time is Now\n");

    fclose(fp);

    printf("\nSongs added successfully.\n ");

    return 0;
}
```

OUTPUT:

```
Songs added successfully.
```

Two more song names added in Playlist.txt

```
≡ playlist.txt
1  Believer
2  Perfect
3  Shape of You
4
5  21 Guns
6  My Time is Now
7
```

4. Write a program that reads all song names from playlist.txt and prints only those that contain the word 'love' (case-insensitive).

Hint: Use the 'in' keyword or equivalent string method for filtering.

```
#include <stdio.h>
#include <string.h>

int main()
{
    FILE *fp;
    char song[100];

    fp = fopen("playlist.txt", "r");

    while(fgets(song, sizeof(song), fp) != NULL)
    {
        if(strstr(song, "Love") != NULL || strstr(song, "love") != NULL)
        {
            printf("%s", song);
        }
    }

    fclose(fp);

    return 0;
}
```

OUTPUT:

```
love dose
love me not
```
